Dover, Delaware 19901

Dear Sir:

We would like to secure your approval to establish a depository for old tires at our Tybouts Corner landfill. We propose to dig a deep pit within our fence and fill it with tires only to a point two (2) feet below our established grade for trash disposal. Tires would then be covered with two feet of dirt and normal trash disposal from this point to finish grade. We feel that this would not contaminate the underground water and would provide the least objectionable disposal of the tires.

Thank you for any consideration this request is entitled to.

Very truly yours,

DEPARTMENT OF PUBLIC WORKS
